## Your selected tyre

### MICHELIN **POWER PURE SC**

Electric, Roadster, Scooter, Step Thru

First quality scooter tyre incorporating MICHELIN Two Compound technology (2CT) for greater grip and sports performance.

Grip

Longevity

Sports performance

All-season

# Key benefits

## Michelin always aims to bring together multiple performances.

At MICHELIN, we never work on one isolated element of performance. Instead, we focus on the whole package: safety, durability and the thrill of riding... all at the same time and with no trade-offs. That's what we mean by MICHELIN® Total Performance™, which has and will always be our difference on every tyre.

### Great grip thanks to MICHELIN's 2CT technology

2CT comprises a harder compound in the centre to cope with hard acceleration and braking, and a softer compound around the edges to maximise lean angle. This was the first scooter tyre incorporating MICHELIN Two Compound technology (2CT), initially developed for racing competition and the top sports bikes on the market.

### Longevity

More durability thanks to the lightly grooved central band on the front and rear tyres: the MICHELIN Power Pure SC tyre has more rubber in the area which takes the most impact.

### Sport and racing

This tyre maintains its great performance throughout its lifespan thanks to the tread pattern which originated from high performance Michelin sports tyres. Rubber compound knowledge developed from racing was adapted to balance grip versus wear.
